

SAFe® FOR DEVOPS

Optimising Your Value Stream with Certified SAFe® DevOps Practitioner

Course overview

To compete in a disruptive global market, every organisation needs to deliver valuable technology solutions at the speed of business. This requires a shared DevOps mindset among all the people needed to define, build, test, deploy, and release software-driven systems—not just the engineers operating a CI/CD pipeline.

The two-day, interactive course helps people across technical, non-technical, and leadership roles work together to optimise their value stream from end to end. Attendees will learn what DevOps is, why it is important to every role, and design a continuous delivery pipeline that is tailored to their business. Attendees work in cross-functional teams to map their current state value stream from concept to cash, identify major bottlenecks to flow, and build an actionable implementation plan that will accelerate the benefits of DevOps in their organisation.

Duration: 2 days*

Topics

- Introducing DevOps
- Mapping your Continuous Delivery Pipeline
- Gaining alignment with Continuous Exploration
- Building quality with Continuous Integration
- Reducing time-to-market with Continuous Deployment
- Delivering Business Value with Release on Demand
- Taking action

What attendees get

- Attendee workbook
- Preparation and eligibility to take the exam
- One-year membership to the SAFe® Community Platform
- Certificate of completion
- SAFe® DevOps Practitioner (SDP) certification upon passing exam

Attendees must attend both days of the course in order to be eligible for the exam.
